

RESOLUTIONS

NACIONAL COE – THURSDAY 10th of JUNE, 2021

The National COE, in permanent session on the 10th of June 2021 unanimously by the full members, resolved:

1. Dispose to the Ministry of Health, Ministry of Foreign Relations and Human Mobility, Ministry of Tourism and to the Council of Government of the Galapagos' Special regime that, within the framework of their competencies, to notify the corresponding agencies, to issue the "Guidelines of Entry by Air to the Country and to the Galapagos Islands," on the following terms:
 - a. Presenting a negative result of an RT-PCR test or negative antigen for COVID-19 detection, up to 72 hours prior to the trip, counting from the collection of the sample (children under 2 years of age are exempt from presenting these tests); or,
 - b. Presenting of the vaccination card against COVID-19 or its equivalent, with the complete scheme, as appropriate, which must be valid at least 14 days before the flight.
 - c. For all travelers whose point of origin is Brazil, they must present a negative RT-PCR test or negative antigen test carried out up to 72 hours before arrival in Ecuador; although being negative, when entering Ecuador, they must perform ten (10) days of isolation at their home or at any place of accommodation of their choice and at the traveler's expense. For people who present a vaccination card or its equivalent with a complete scheme and valid for at least 14 days prior to the flight, will NOT perform isolation.
 - d. For the entry of tourists, nationals or foreigners to the Galapagos Islands, compliance with literal a) or b) of this resolution will be requested, in addition to the traffic control card issued by the Council of the Galapagos Government, eliminating the safe conduct managed by a tour operator or by an accommodation regulated by the Ministry of Tourism (except for the safe conduct for tour leader established in article 12 of the Tourist Guidance Regulations for the Special Regime of the Province of Galapagos).

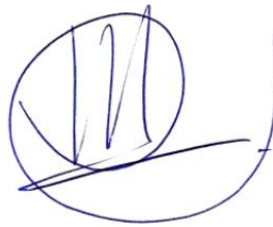

- e. This provision will be valid from 23:59 on June 30th, 2021, and the Ministry of Foreign Affairs and Human Mobility, and; the Ministry of Transport and Public Works, will be the governing entities of the socialization of this provision.
2. Provide the Ministry of Foreign Affairs and Human Mobility to coordinate the actions required with the pertinent institutions and the Provincial COE of Sucumbíos, for the development of humanitarian and commercial actions of an exceptional nature, with Colombian authorities, to meet food supply needs of the bordering Colombian populations in the frontier zone of the Bridge over the San Miguel River, taking into consideration that for health reasons the Ecuadorian land borders remain closed. These humanitarian actions will be temporary, until when the conditions require them.
3. Remind the Decentralized Autonomous Governments that the Organic Law for the Prevention and Punishment of Violence in Sports is currently valid, which establishes the powers of national and local authorities for the development of sports events; in article No. 22 of the Law in reference, which establishes that the Municipalities and National Police Stations (dependencies of the Ministry of Government) are the competent authorities to: “Issue or revoke by means of a motivated resolution the permits and authorizations for the realization of sporting events after the verification of compliance with the enabling requirements, especially the security plan, prevention and risk management in sports venues and events approved by the respective risk unit of the autonomous decentralized municipal or metropolitan government, or the delegate of the governing body of the risk management public policy”.

The Article No. 12 establishes as a requirement for the authorization of mayors, the presentation of a Safety, Prevention and Risk Management Plan in sports venues and events. This plan, when the capacity exceeds five thousand people, requires the approval of the National Risk and Emergency Service.

Finally, the National COE, through a Resolution of the 20th of May 2021, established that no municipal government at a national level will grant permits for public shows, which is why, at this time, there is no authorization for the holding of matches with the presence of public in stadiums. Since our country faces a health crisis due to the Pandemic, the leadership corresponds to the Ministry of Public Health, so the reactivation of any activity that puts the population at risk or implies an agglomeration of people in massive events requires its assessment through reports and technical analysis.

Given at the National Risk and Emergency Management Service, in the Plenary session of the National COE - virtual, on Thursday June 10, 2021.

I certify. –
